HEALTH MANAGEMENT ASSOCIATES

Draft Contracting Term Sheet

Primary Care Provider

The purpose of the worksheet is to apply what you have learned about contracting to create a mock contracting strategy for your organization. There are some terms that will not apply to your situation. For example, those listed under shared savings/risk would not apply to provider entities who are only negotiating a pay-for-performance contract. The terms in the second column are for illustrative purposes only. The user should review each and modify the strategy as appropriate to their individual circumstances.

TERM	CONTRACTING STRATEGY (sample for illustrative purposes only; modify for your organization)	TERM DOES NOT APPLY (note with an X)
Term of Agreement	Reset annually; negotiations commence at least 90 days before new year.	
	Modification mid-year only by mutual consent	
	Termination mid-year only by mutual consent except for breach of contract	
Information Exchange		
Member rosters	Delivered electronically by the first of the month	
Inpatient authorizations	Delivered daily for assigned members; include authorizations for transfer to post-acute care facilities	
Care management	Sharing of care plans of members in the health plan's high-risk care management program.	
Performance on quality metrics that have financial implication	Access to performance on the health plan's provider portal that indicates overall score and allows drilldown to the member level and benchmarked against plan wide performance; updated at least monthly.	
Total cost of care report (applies to shared savings or risk arrangements only)	Monthly report of MLR with a calculated IBNR.	
Utilization reports (applies to shared savings or risk arrangements or when one or more of these hospital utilization metrics are part of a pay-for-performance program)	Monthly report of ED utilization (separated by potentially avoidable or not), hospitalization rates, hospitalization rate for ambulatory sensitive conditions, all-cause 30-day rehospitalization rates, and benchmarked against plan wide performance.	
High-cost member list (applies to shared savings or risk arrangements only).	List of members with a rolling 12-month total cost of care of more than \$100,000.	
Frequent ED utilizer list (applies to shared savings or risk	List of members with four or more ED visits in a rolling 12-month period.

HEALTH MANAGEMENT ASSOCIATES

Setting the baseline (% premium vs. historical spend)	Medical loss ratio that is a 1% improvement over historical experience but never <88%	
Risk adjusted benchmark	Yes	
Trending the benchmark	Benchmark is increased proportional to increase in plan premium	
Claims run out period/IBNR	Six months with IBNR calculation using actuarially sound principles	
Minimal savings threshold	None	
Minimal loss ratio	Ideally 2% but not if requires a symmetrical minimal savings ratio	
Risk corridor	When risk assumed, shared Losses will be limited to the lessor of reserves or 3% of the amount funding the pool multiplied by the risk share. No shared savings corridor.	
High cost claimants	\$100,000-\$150,000 threshold with 100% coverage of claims overage	
Shared Saving/Risk %	50-50% split; 10% of savings placed in an escrow account to build a reserve pool	
Quality gate to accessing the savings/risk pool	Ideally (but not realistically) none	
Impact of payment of savings on subsequent year's savings pool	Not charged as an expense
